

IIHR Annona variety- Arka Sahan – Technical knowledge support

Shri Srinivas, a progressive farmer at Magadi, Bengaluru, Karnataka has procured the planting materials of Arka Sahan and Balanagar from IIHR, Bengaluru during 2007 and established in an area of about 2 acre. The trees are 8 years old and the plants are fruit bearing stage. Shri. Ravindra kumar, Senior Technical Officer, has visited the Annona field on 02.09.2015 upon the farmer request. The farmer was given the knowledge about training and pruning, watering, basin cleaning, FYM application etc for young plants. Farmer was advised about the importance of assisted pollination for enhanced fruit size and yield and also regarding the management of fruit fly in Annona.
